

# VALUE STREAM MAPPING TWO-DAY WORKSHOP

## LEARN TO ELIMINATE WASTE

Value Stream Mapping is a reliable tool for understanding your organisation and eliminating wastes.

Our Value Stream Mapping workshop specifies the correct techniques to successfully implement Value Stream Mapping in your organisation and create a culture of operational excellence.

This unique workshop allows micro-behaviours to be defined immediately and further engages you to participate and learn Value Stream Mapping at an operational level.

TXM Training practitioners check your understanding and role-play conversations to demonstrate what really happens in the work place. Our practitioners then identify boundary conditions and role play the ideal situation as the current state is unravelling.

Our Practitioners will teach you how to overcome the stumbling blocks of Value Stream Mapping. As a result, this will improve the quality of the mapping process, team interactions and the overall outcome to your organisation.
